Official Rule	Why
No Smoking	Smoking can bother other passengers. City policy states no smoking in City owned vehicles.
No Drinking	If you spill something, it can get on other people and make floors and seats slippery
No Eating	Same as above, plus food leftovers can attract pests
No playing of any audio devices	Even with headphones on, loud music is distracting to the bus driver and disturbs other riders.
No cursing, swearing or disruptive behavior	This can also bother other riders and distract the driver. Please keep your conversation to a low level.
No littering	Litter makes the bus unpleasant to ride in, harder to clean, and it can attract pests.
No hazardous materials, such as gasoline cans or car batteries	Materials like these are a fire hazard, hazardous materials are not to be kept in confined areas.
All strollers must be folded	Someone could trip over them in the aisle and they may block seats where people need to sit.
Do not open windows while climate control systems are in operation	It makes it harder to heat or cool the bus. If you're too hot or cold, tell the driver; he or she may turn it on or off for a while to regulate the temperature.
Do not stick hands, arms or head out open windows	This is common sense too; we want to get you to your destination in one piece!
Standing forward of the standee line is not permitted	The area in front of the yellow line must be kept clear so that the driver can see in all directions.
Conflict Resolution	Passengers who willfully become destructive, unruly or abusive to a bus driver or other passengers will not be allowed to ride Minot City Transit until a parent, guardian of a minor or the adult involved contacts the Transit Superintendent or Public Works Director.
No Pets Allowed Except Service Animals	Some people may have allergies and also for sanitary reasons. Service animals are allowed on Minot City Transit buses.

## HOURS OF SERVICE

## BOARDING THE BUS

Wait for passengers to exit the bus before entering. If you use a mobility device, such as a wheelchair or walker, a ramp or lift may be deployed for you to board the bus. If you do not use such a device but require the ramp in order to safely board the bus, tell the driver that you need the ramp and he/she will lower the bus and deploy the ramp. After boarding and paying your fare, sit down so that the bus may proceed on the route.

All transferring takes place at the Minot City Transit Center. **PLEASE ASK THE DRIVER FOR A TRANSFER TICKET WHEN YOU EXIT THE BUS. WHEN BOARDING THE NEXT BUS, INSERT THE TRANSFER TICKET INTO THE FAREBOX.**

## **HOW TO BOARD WHEELCHAIR - LIFT EQUIPPED BUSES**

1. Indicate you want the bus by waiting about 4 feet from the curb on the sidewalk of a street corner or bus stop.
2. The operator will open the door from inside and will come outside to operate the lift. The operator will lower the lift to the ground. Roll either forward or backward onto the lift. If possible, avoid bouncing onto the lift. When in place set your brake or turn off power.
3. The bus operator will raise the lift to floor level. You then release your brakes and proceed to the wheelchair tie-down area
4. The operator will stow the lift and for your safety, secure the wheelchair in the tie-down area.
5. The operator will secure you with a lap and shoulder restraint at your request (they are not required).
6. Approximately  $\frac{1}{4}$  block from where you wish to exit, push the "stop requested" tape or touch pad.
7. To exit, reverse the boarding processes and when the operator lowers you to ground level, exit carefully off the lift.

## **HOW TO BOARD WHEELCHAIR – RAMP EQUIPPED BUSES**

1. As the bus approaches your stop, be sure it is the correct bus before boarding. Each AVTA bus has a destination sign over the windshield, and on the curbside of the bus, displaying the route name and number.
2. Please wait until other passengers have boarded and position your wheelchair at least three feet back from the curb. The driver will extend the ramp so that you may enter the bus. Please listen and carefully follow any instructions given by the driver.
3. Roll your chair backward up the ramp. Once your chair is in position, lock your wheelchair brakes and the driver will use tie downs to secure you and your wheelchair.
4. Please tell the driver the location where you want to de-board so that the driver can properly position the bus at your departure point.
5. Your wheelchair must be properly secured and brakes set before the driver will move the bus.
6. Please signal your departure approximately one block ahead of your stop by using the signal cord or tape located above the window.
7. When it is clear to do so, the driver will extend the ramp so that you can carefully exit the bus.

## **PASSENGERS THAT CANNOT CLIMB STEPS**

1. When the operator opens the door, inform them that you need to use the lift or ramp

2. The operator will exit the bus, and direct you to step back while the lift is being deployed. The operator will then direct you to walk onto the lift.
3. The operator will then raise the lift to floor level and direct you to enter the bus from the ramp. Once seated, the operator will then stow the lift.
4. To exit the bus, push the “stop requested” touch bar or pad  $\frac{3}{4}$  block from where you wish to exit.
5. Reverse the boarding procedure and when the lift reaches the ground, carefully walk off the lift.

## **OPERATION OF BIKE RACK**

### **LOADING BIKES**

1. Prepare your bike for loading. Remove water bottles, pumps and other loose items that could fall off while the bus is in motion.
2. Inform the bus driver that you will be loading your bike. You must load your bike from the curb or in front of the bus. Do not step into oncoming traffic to load your bike.
3. Squeeze handle up to release latch, then fold down the bike rack. You only need to use one hand to unlatch and pull the bike rack down, so you can hold your bike with your other hand. It is not necessary to lean your bike against the bus.
4. Lift your bike onto the bike rack, fitting wheels into proper wheel slots. Each wheel slot is clearly labeled for the front wheel. The purpose of the directional placement is to make the bike nearest the bus easier to unload.
5. Raise the Support Arm over the front tire. The Support Arm’s number one purpose is to add lateral support when the bus is in motion or at rest. Many bikes will sit in the wheel well without the use of the Support Arm, but rims and tires will sway back and forth without its use.
6. Board the bus and enjoy the ride! Choose a seat near the front of the bus to keep an eye on your bike. DO NOT FORGET you have a bike with you when you get off at your stop. New riders often do!

### **UNLOADING BIKES**

1. Inform the bus driver that you will be unloading your bike as you approach your stop. Unload your bike from in front of the bus or from the curb, not from the street.
2. Raise the Support Arm off the tire. The Support Arm automatically folds down to a secure position.
3. Lift your bike out of the bike rack.
4. Fold up the Bike-Rack-for-Buses if there are no bikes on the rack and no one else is waiting to load their bike. The bike rack locks in place.
5. Step away from the bus with your bike.
